Sampson County Health Department

Annual Report 2017-2018

Message from the Health Director

The Sampson County Board of Health and the staff of the Sampson County Health Department are pleased to provide you with our annual report for fiscal year 2017-2018. The Sampson County Health Department works hard to accomplish our mission- to preserve, protect and promote the health, environment and well-being of the citizens of Sampson County. This report was developed to inform Sampson County residents and officials of the progress made by their Public Health Department to meet this mission.

The demand for our services has increased over the past year due to the economy. Our case management services have doubled due to policy changes by the Division of Medical Assistance. Clinic numbers continue to increase due to the need for client services. United Way and the Sampson County Breast and Cervical Cancer (BCCCP) Advisory Board co-sponsored the 19th annual rally and health fair. We continue to work with the Sampson County Healthy Carolinians Task Force to partner and focus on the areas identified in our community health assessment while continuing to provide much need safety net services to Sampson County residents. I am proud of the many programs provided by our staff and the diligence with which they work to improve the health of Sampson County.

Thank you for taking the time to review our annual report,

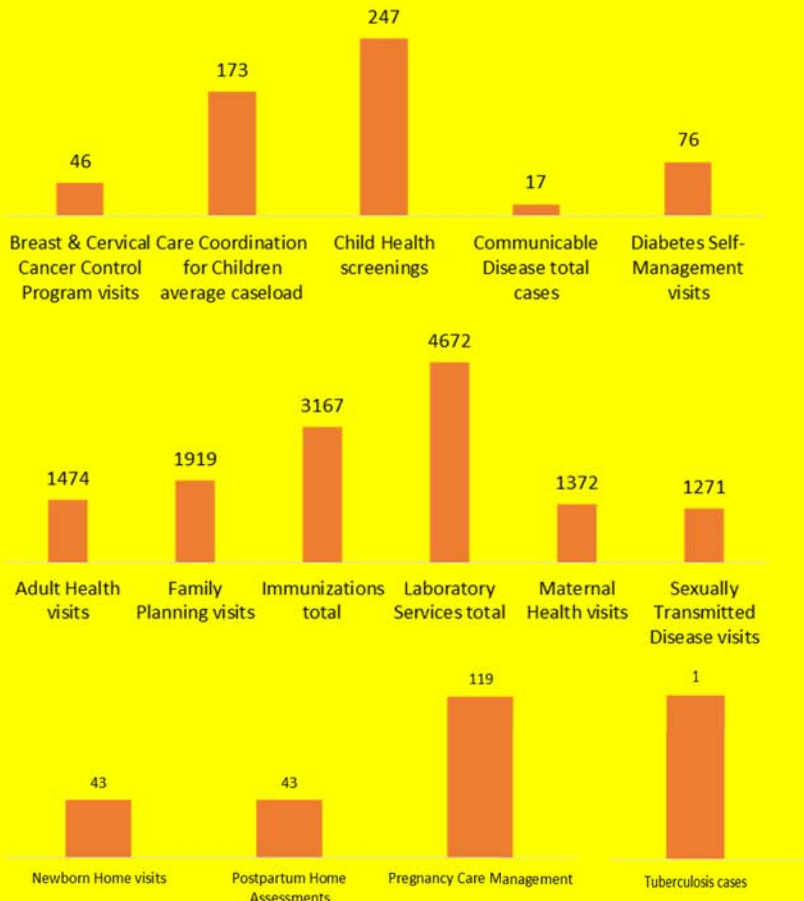

Wanda Robinson
Health Director
